UNIDENTIFIED. 6074.0, 8GAL, Jan 13 started CW marker a few seconds early, overlapping the Russian time signal at 1400.

UNIDENTIFIED. 8GAL, 6074, heard once again Jan 17 at 1400-1401 with VVV/CQ marker, but not audible Jan 18 at same time.

UNIDENTIFIED. 6074, not having checked for it in over a week, 8GAL still there as usual at 1400-1401 Jan 29 with V/CQ marker immediately after, or slightly overlapping the closing time signal from Russia 6075. Nothing further heard on CW in the next few minutes.

UNIDENTIFIED. 6074, 8GAL V/CQ marker was the most out of synch I have heard it yet compared to the closing R. Rossii time signal at 1400 Feb 7. VVV started a bit before the TS did.

UNIDENTIFIED. Not having checked 8GAL for several days, I did so Feb 21 at 1400 on 6074. Usual VVV/CQ CQ CQ marker started up immediately on CW after Russian time signal on 6075 and as I switched on BFO to keep hearing it. But the marker stopped before DE. This was about the same time the Russian carrier went off. Several seconds later, 8 dits came over two or three times, which means "error", and then the marker started over to completion, ending about 1401:30. First time I have heard this happening: implies it is actually done manually rather than automatically.

---
